Homework 6: Insight Generation

(45 points total)

Student Name	Rey Stone
Student ID	111044637

Focus of these questions
• These questions encourage you to develop your own knowledge, comprehension and conceptual understanding and to connect, synthesize, and/or transform your ideas into a new form (i.e. be a creative thinker and contribute your ideas and thoughts). • These questions encourage you to evaluate arguments, evidence, assumptions, and conclusions about key issues presented in the charts • These questions will help you develop independent insight generation from existing charts. Charts embody multiple insights into what is presented. This exercise aims to train your mind to identify and document these alternative conclusions/takeaways • To answer the questions, look at the charts and think about the current takeaways presented on top of each chart. Imagine (and document) other insights that are present in the visualization • Use your own judgement – the insights you identify must be obvious on the chart to qualify as a correct answer

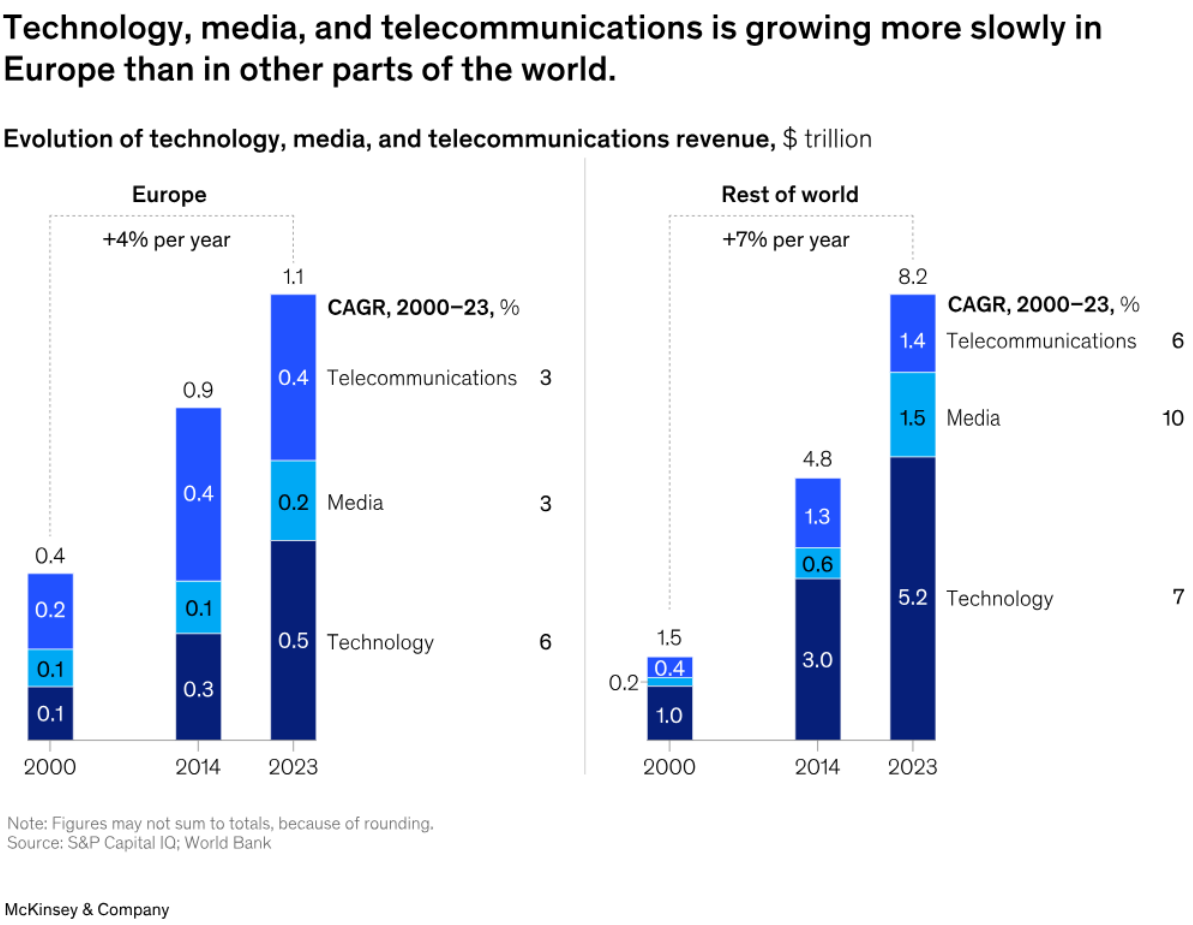

Chart 1 (15 points):

In the table below, provide 3 (three) takeaways Chart 1 above can have besides the current takeaway.

List of alternative takeaways that Chart 1 can have:
1. Africa is the only region where low-cost airlines shares have decreased. 2. Europe has the most low-cost airline share increase than any other region. 3. The Middle East saw the biggest jump of low-cost airline shares from 2019 to 2024.

Chart 2 (15 points):

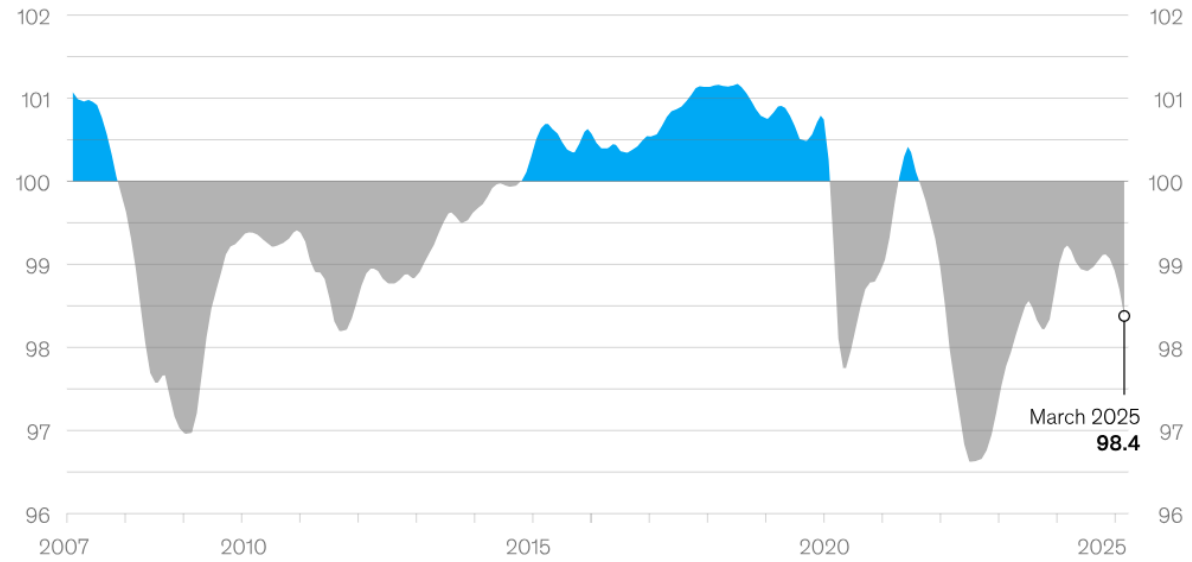

In the table below, provide 3 (three) takeaways Chart 2 above can have besides the current takeaway.

List of alternative takeaways that Chart 2 can have:
1. Technology has increased the most in Europe and the rest of the world. 2. Media is the slowest grower compared to telecommunications and technology. 3. There has been more advancement in all three areas from 2014 to 2023 than from 2000 to 2014.

Chart 3 (15 points):

High consumer prices and uncertainty continue to affect households, leading to low levels of overall consumer confidence.

OECD global consumer confidence,[1] index (100 = long-term average)

[1]Out of 15 risks that were offered as answer choices. June 3–7, 2024, n = 927; Aug 28–Sept 6, 2024, n = 1,203; Nov 27–Dec 6, 2024, n = 912; Feb 26–Mar 7, 2025, n = 988.

McKinsey & Company

In the table below, provide 3 (three) takeaways Chart 3 above can have besides the current takeaway.

List of alternative takeaways that Chart 3 can have:
1. The first biggest dip in consumer confidence aligns perfectly with the 2008 recession in the United States 2. The second major dip happened right when the COVID pandemic hit. 3. Throughout the almost 20 year time period, consumers are less confident than more confident.
