Homework 5: Insight Generation

(45 points total)

Student Name	Rey Stone
Student ID	111044637

Focus of these questions
• These questions encourage you to develop your own knowledge, comprehension and conceptual understanding and to connect, synthesize, and/or transform your ideas into a new form (i.e. be a creative thinker and contribute your ideas and thoughts). • These questions encourage you to evaluate arguments, evidence, assumptions, and conclusions about key issues presented in the charts • These questions will help you develop independent insight generation from existing charts. Charts embody multiple insights into what is presented. This exercise aims to train your mind to identify and document these alternative conclusions/takeaways • To answer the questions, look at the charts and think about the current takeaways presented on top of each chart. Imagine (and document) other insights that are present in the visualization • Use your own judgement – the insights you identify must be obvious on the chart to qualify as a correct answer

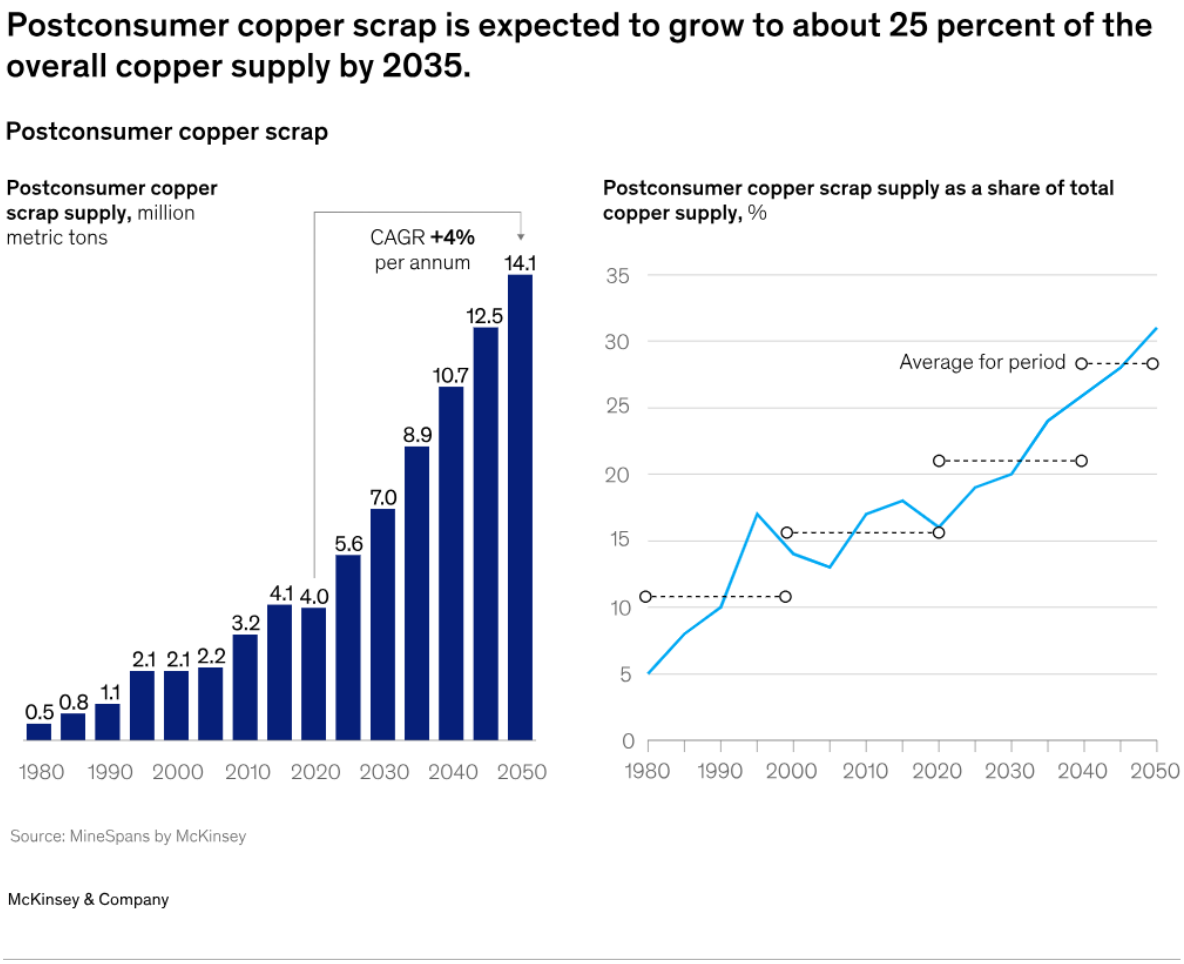

Chart 1 (15 points):

In the table below, provide 3 (three) takeaways Chart 1 above can have besides the current takeaway.

List of alternative takeaways that Chart 1 can have:
1. The European Union expresses the least amount of worry across the board. 2. G20 Emerging expresses the most amount of worry across the board. 3. Nobody is worried about the monetary and financial sectors.

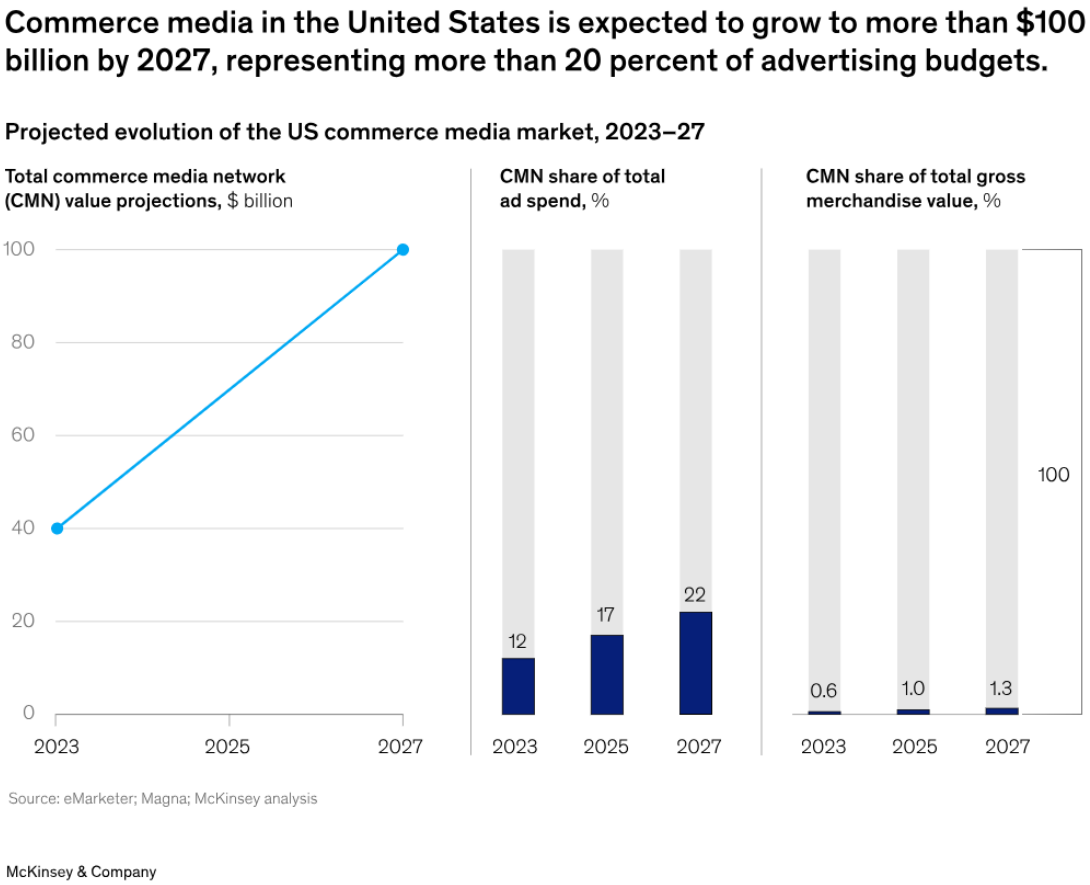

Chart 2 (15 points):

In the table below, provide 3 (three) takeaways Chart 2 above can have besides the current takeaway.

List of alternative takeaways that Chart 2 can have:
1. Postconsumer copper scrap is expected to grow exponentially throughout the decades. 2. The 2008 recession and the pandemic are the only major drops in the postconsumer copper supply line chart. 3. Our increased dependence on technology could be one reason why the post consumer copper scrap supply is growing.

Chart 3 (15 points):

In the table below, provide 3 (three) takeaways Chart 3 above can have besides the current takeaway.

List of alternative takeaways that Chart 3 can have:
1. Delivering targeted ads to people using their data is a more effective way to advertise certain products to certain consumers. 2. When you appeal to people's taste preferences (i.e. use their data to create data-driven advertisements), they are more likely to buy the product! 3. To advertise to a more personalized Internet experience, turning towards first party data is becoming more popular to appeal to individual users and their preferences.
